Salesforce Platform Developer- II

Name of the Certification: - Salesforce Platform Developer – II Multiple Choice Questions (SU18)
Location and Date of Certification: - 26nd November 2018 (Los Angeles, USA)

Length of Training Program: - 6 weeks

Pre-requisite Examination: - Salesforce Platform Developer - I

Background and Objective: -The Salesforce Certified Platform Developer II (PDII) credential is designed for those who can demonstrate their skills and knowledge in advanced programmatic capabilities of the Force.com platform and data modelling to develop complex business logic and interfaces. For successful completion of the exam the candidate needs to ace the below concepts:

• Design, develop, test, and deploy programmatic solutions that are maintainable and re-usable

• Follow Apex design patterns and object-oriented programming best practices

Before, Salesforce Certified Platform Developer II (PDII) certification comprised of two steps. Firstly, candidate must appear for a proctored multiple-choice question. After successfully passing the first step, candidate must complete a technical assignment and get it reviewed. The time taken to get oneself Platform Developer II certified was generally around several months.

Path to Certification: - Effective June 28, 2017, the Salesforce Certified Platform Developer II (PDII) certification will comprise of two parts: a proctored multiple-choice exam and four Trailhead super badges. These super badges will replace the Programming Assignment and thus intended to be useful in gauging candidate's knowledge on advanced, real-world business requirements covering features, concepts, and scenarios that are essential for a Platform Developer II to know, including Apex programming, data integration and more.

The four super badges Apex Specialist, Data Integration Specialist, Lightning Component Framework Specialist, and Advanced Apex Specialist.

Conclusion

The recent changes in the Platform Developer II (PDII) certification path has garnered mixed opinion from the developers' fraternity. As a general sentiment people stated that taking the certification route to trailhead badges may decrease the difficulty level for the exam. However, the change will reduce the time taken by an individual to get Platform Developer II (PDII) certified.

Executive Summary

My name is Anupam Sahay, I live in California and have worked as an SAP Consultant in India. I have completed my Salesforce Developer and Admin certifications. These certifications will help me to get a job that combines aspects of the Administrator, Developer and Business Analyst roles in equal measure. My key responsibility in a project as a Salesforce consultant is to guide all the to Salesforce design choices in data models, security regimes and automation methods that will ensure the best combination of reliable data collection, analytic flexibility, strong security, integration compatibility, scalability and more.

Doing this well requires understanding the Salesforce platform from the oldest to newest features. I maintain my Administrator and Developer Certifications as a baseline of familiarity with all key features. I don't and couldn't know everything, but I know a broad swath of the platform with exceptional depth in a few areas. And that helps me learn new elements quickly when necessary.
